**Approximately how many residents received an indirectly benefit (# of those benefiting from the participant receiving the service) from this program:** 100

## GOALS & OBJECTIVES

**Goal 1 & Objectives: From your application, please provide your measurable outcomes for each of your stated objectives.**

Staff hired and trained to implement Triple Play Program at each site.

Participation counts kept we reached an average daily attendance of 214 members. (numbers less because of COVID, we can't have as many children in our buildings).

Family Nights are held virtually because of COVID. At PJH they had a "family dinner".

## PARTICIPANT SUCCESS STORY

### Participant Success Story:

Maverick has been a member for several years. He has always been a shining star in our programs. Maverick has almost perfect attendance at our program and consistently participates in the Triple Play activities. Most recently Maverick was one of the "chefs" in our PJH Family Dinner Night. The participants created the menu for the dinner, prepared and cooked the meal and took the food home to share with families.

## Participant Success Story:

## ACKNOWLEDGEMENT

**Please describe how the Fallbrook Regional Health District's investment in this program was acknowledged during this reporting timeframe.**

We acknowledge the Health District on our Facebook and Instagram accounts.

**Acknowledgment example: please upload an example of one method in which the District was acknowledged.**

Healthcare District Q3.pdf

## BUDGET

**Please upload a copy of the program budget you submitted with the application, with an additional column demonstrating the current utilization of grant funds.**

Copy of Quarterly Budget Report.xlsx

**Please explain any significant differences in budget or services during this quarter. What if any changes were made to address programming challenges.**

Due to the COVID 19 restrictions our programs can only serve a quarter of the number of children and the supply cost has doubled.

### Fallbrook Regional Health District

Tooth decay is the most common childhood disease even though it is almost entirely preventable

Tooth decay in children is five times more common than asthma. Three out of every five children are affected by tooth decay.

Prevent tooth decay in children by encouraging them to brush their teeth twice a day with a fluoride toothpaste and floss before bed.

A healthy diet that limits sugary beverages and snacks will also aid in

La caries dental es la enfermedad infantil más común a pesar de que es casi totalmente prevenible.

La caries dental en los niños es cinco veces más frecuente que el asma. Tres de cada cinco niños son afectados por la caries dental.

Se puede prevenir la caries dental en los niños con animándolos a cepillarse los dientes dos veces al día con una pasta de dientes con flúor y usar hilo dental antes de acostarse.

Una dieta saludable que limite las bebidas azucaradas y las botanas
