AGENDA
FACILITIES COMMITTEE

Monday, September 26, 2022 at 12:00 P.M.
Virtual and In-Person at Administrative Office
1st Floor Community Room, 138 S. Brandon Rd., Fallbrook

In accordance with California Government Code Section 54953 teleconferencing will be used for this meeting. Board members, staff and members of the public will be able to participate by webinar by using the following link:  https://us02web.zoom.us/j/84595811563
Meeting ID: 845 9581 1563 Participants will need to download the Zoom app on their mobile device. Members of the public will also be able to participate by telephone using the following dial in information: Dial in #: (310) 372-7549, Passcode 660448.

Committee Members: Barbara Mroz and Stephanie Ortiz
Staff: CEO Rachel Mason, Executive Assistant Linda Bannerman, Wellness Center Administrator Theresa Geracitano, Administrative Officer Judith Oswald
Property Manager: Roy Moosa

1. Call to Order/Roll Call
2. Public Comments - Announcement
   Members of the public may address the Board regarding any item listed on the Agenda at the time the item is being considered. Members of the public attending in-person need to fill-out a “Request to Speak” card and those attending by webinar need to raise your hand at this time and identify the Agenda item they would like to speak on. The Board has a policy limiting any speaker to not more than five minutes.
3. Discussion Items
   a. Construction Management (CM) Proposals
4. Update from Wellness Center Administrator
5. Update from Property Manager
6. Board comments and future agenda items
7. Adjournment

I certify that on September 23, 2022, I posted a copy of the foregoing agenda near the regular meeting place of the Board of Directors of Fallbrook Regional Health District, said time being at least 24 hours in advance of the meeting. The American with Disabilities Act provides that no qualified individual with a disability shall be excluded from participation in or denied the benefits of District business. If you need assistance to participate in this meeting, please contact the District office 24 hours prior to the meeting at 760-731-9187.

Construction Management Services for Community Health and Wellness Center

September 16, 2022
Building Value Through Expertise
September 16, 2022

Fallbrook Regional Health District
Attention: Rachel Mason, Chief Executive Officer
138 S. Brandon Road,
Fallbrook, California 92028
rmason@fallbrookhealth.org

Re: Request for Proposals to Provide Construction Management Services for Community Health and Wellness Center for Fallbrook Regional Health District

Dear Ms. Mason,

On behalf of Cumming Management Group, Inc. (Cumming), I am pleased to present our qualifications to provide construction management services for the design and construction phases of the renovation and redesign of your Community Health and Wellness Center for Fallbrook Regional Health District. This project will provide a critically needed modernization and will enhance the community’s experience. Our team has had the opportunity to collaborate with Taylor Design on other projects and looks forward to the opportunity to continue that working relationship for the District. Our team has extensive experience with public projects, working on occupied sites and campuses, scheduling phasing and logistics, leading community and stakeholder engagement, and ensuring site safety. We, at Cumming, are genuinely excited about the prospect of working with the Fallbrook Regional Health District to deliver such an important project.

As demonstrated herein, Cumming has been providing these services to clients throughout California for over 26 years. With our seasoned project team, decades of extensive local experience in California, and collaborative project approach, Cumming is uniquely qualified and well-positioned to provide you with expert services that meet all your needs. Specifically, our team brings the following benefits to this project:

---

**An Experienced Project Team with Excellent References** — Our project team has deep knowledge, extensive experience, and excellent references from completing hundreds of projects in California - including multiple projects together. Our team includes seasoned veterans in project management and construction management, cost estimating, scheduling, and many more. Our team members also include Certified Construction Managers, Licensed Architects, Professional Engineers, DBIA members and Energy-Sustainability certified experts. Our project leadership is among the strongest in the industry.

**Demonstrated Project Process with Similar Projects** — Our key goals are to deliver your project on budget, within schedule, and to the highest level of quality. Cumming’s core philosophy is “Manage each project like we own it.” Our team proactively leads, challenges, motivates, and directs team members to generate superb results that save money and time, mitigate risk, and achieve our clients’ delivery goals. Our team has performed over $20 billion in project and construction management for projects all over California, including extensive renovation work for municipalities.

**Integrated Management Services** — Cumming is truly an integrated Construction and Project Management services company. We will manage your project from our San Diego office with support from our other Southern California offices located in Murrieta, Aliso Viejo and Los Angeles. Our breadth and depth of experts that we use collaboratively, makes Cumming unique from our competition.

As Executive Vice President and the District’s proposed Project Executive, I will be responsible in an oversight capacity for work and will lead our construction management and project management planning team. I am the authorized officer of the firm representing Cumming in all matters and will bind the firm to all commitments made in the response. Thank you for this opportunity to submit our statement of qualifications.

Sincerely,

Cumming Management Group, Inc.

Anthony L. Sanchez, RME, DBIA Assoc
Executive Vice President

We strongly believe that our role is to implement the vision of our client.
Executive Summary
Section 3  Executive Summary

Provide an overview of the entire proposal describing the general approach or methodology the Proposer will use to meet the goals and fulfill the general functions required as a Construction Management.

Cumming’s philosophy is “Manage each project like we own it.” We create value for our clients through our proven expertise and build lasting relationships based on trust, reliability, and results. Our team brings extensive experience working on publicly-funded projects, on and around occupied sites. Most of our recent work has required coordinating complex phasing and logistics to ensure site safety, while keeping the community and stakeholders informed.

Cumming provides its services to public agencies as an owner’s representative; we work collaboratively and transparently with client stakeholders to deliver services that achieve our client’s goals and objectives. Our core values are:

- **Client Focus** is central to who we are and is a fundamental component of our success. We listen to our clients and provide services and solutions that meet their needs.

- **Team Members** are the life and blood of our organization. It has always been the combined experience and effort of our team members that has made Cumming successful. Knowing this, we hire only the very best people.

- **Integrity** is more than just operating within the parameters of the law. It is also about being ethical and moral. As one team member put it, “It not only has to be right, it also has to look and feel right.” At Cumming, integrity is about treating people and companies the way we want to be treated. It is about doing what we say we are going to do and following through. Simply stated, we do the right thing, always.

- **Quality** has been, and will always be, our core differentiator. We have a culture of continuous improvement, whereby our collective progress as a company is achieved through the ongoing personal growth of our team members.

Executive Summary of the Proposal

Cumming’s submittal includes responses to each of the items required in the RFQ. Below, we have listed these items in order (excluding this Executive Summary) and provided a summary of our response to each.

Section 1: Identification of the Proposer

We have provided a letter of interest and other specific company information requested in the RFQ. Below, we have listed these items in order (excluding this Executive Summary) and provided a summary of our response to each.

26 Years of Owner’s Rep and Project Management Experience

More than 2,500 Public Sector Projects Successfully Completed in California Alone.

A Portfolio of over $300 Billion in Construction Nationally

The delivery of each project on-budget, on-schedule, and on-quality is our primary goal for every client.
Fallbrook, California - Construction Management
Community Health and Wellness Center

Section 2: Table of Contents
A table of contents is provided at the beginning of the proposal.

Section 3: Executive Summary
We have provided an overview of the entire proposal describing our general construction management approach.

Section 4: Firm Information and Experience
Cumming is a C Corporation and was founded in 1996 and incorporated in 2006 in the State of California. Cumming has over 26 years of experience providing construction management services for various public sector clients. We have provided an overview of our services and provided a list of all proposed personnel for the Fallbrook Community Center Project.

Section 5: Proposed Project Management Team
We have summarized our proposed team members’ qualifications in this section for the District’s consideration. Our team is prepared to address the full range of construction management services to meet your needs.

Section 6: Project Specific Experience
We have provided our most relevant construction management contracts for public agencies. These examples highlight the program management expertise of our proposed team members.

Section 7: Proposed Methods to Accomplish the Work
Cumming’s project managers proactively lead, challenge, motivate and direct teams to generate superb results that save money and time, mitigate risk, and achieve our clients’ delivery goals. We have elaborated on our approach, expertise, and experience in preconstruction, bid phase, construction and closeout, post construction, and QA/QC.

Section 8: Knowledge and Understanding of the Local Environment
Cumming has been performing construction management services in the San Diego County region since its inception. As a result of this experience, we are adept at managing internal resources, maintaining personnel flexibility, and assigning experts quickly and efficiently. Cumming would provide services for the Fallbrook Community Center project from our San Diego office, with as needed support from our other California office locations.

Section 9: Fee Schedule
Cumming has included our proposed personnel, their classifications, and hourly rates, including overhead and profit.

The following outlines our full suite of services and reflects our unique ability to offer not only comprehensive project and cost management, but also à la carte services at any stage of project development. This approach — mixing custom flexibility with the full capabilities of our company — ensures that our clients are getting exactly the services they need and want, exactly when they need and want them.

Firm Information and Experience
Section 4  Firm Information and Experience

a) Provide total number of professional staff employed by the firm.

Cumming is one of the nation's fastest-growing providers of construction management services. Now, in our 26th year in business, Cumming has 1,400+ employees in 52 offices worldwide.

b) Demonstrated experience in the management of construction projects.

Established in 1996, Cumming is an industry leader in providing project and construction management, cost estimating, scheduling, quality control, and other related services. Collectively, our local portfolio accounts for more than $20B in construction - nearly all of which has been completed in the State of California, giving us an unmatched level of experience here in the State.

c) The Proposer shall state the number of years the firm has conducted business. Proposer must have at least six (6) years experience in providing the outlined scope of required services for public clients and/or public projects.

Cumming has conducted business for 26 years including experience outlined in the scope of services for the District. Our project experience includes the completion of more than 2,500 public projects for cities or public agencies, bringing extensive experience and in-house knowledge to your project.

Through our experience, we have honed our approach to provide top-notch construction management services, including everything from comprehensive construction management to cost management/estimating, scheduling, energy consulting, dispute resolution and avoidance services, and more. We have the unique ability to offer not only comprehensive project and construction management, but also à la carte services at any stage of project development. Our team members bring extensive experience working on and around occupied sites and campuses, scheduling complex phasing and logistics, leading community and stakeholder engagement, and ensuring site safety.

Strictly Owner Advocates

The key characteristic that differentiates Cumming from other construction industry service providers is Cumming's unwavering role as strictly an owner's representative and project manager. Many of our competitors design and/or build facilities while also attempting to represent owners fairly and objectively. True advocacy is not always possible when the Owner’s interests are not the primary interests.

The Cumming Team

Cumming is considered a premier provider of construction management services. As such, Building Design + Construction ranks Cumming #7 among the nation's top 75 construction managers, and we have ranked on Engineering News-Record's listing of the Top 100 Construction Management-For-Fee firms for 16 years in a row, the last three of which we were in the top 20.

Proposed Program Management Team
Section 5  Proposed Program Management Team

Identify key members that will be assigned to the Wellness Center Project support. Indicate the role of each individual. Include a resume reflecting the educational backgrounds as well as the skills and experience as construction management in design and construction phases. The Construction Manager must demonstrate an ability to be able to draw upon a multidisciplinary staff to address Construction Management services.

Proposed Personnel
Our proposed team structure is organized to provide the Fallbrook Regional Health District with the greatest value, flexibility, and expertise working with multiple stakeholders, from procurement and to post-construction. Our team will work closely with your staff and facilities group. We have selected team members to support the daily efforts of our project in key personnel roles, as well as in supporting resource roles. The team organizational chart can be found below.
Daniel Silva
Sr. Project Manager

Education

Daniel is a results-oriented, senior project construction manager with over 15 years of construction and project management experience and a creative problem-solving attitude. He has a successful track record in multiple sectors, successfully completing projects for public works, public infrastructure, and healthcare facilities clients. Throughout his career, Daniel has lead and managed complex small, medium and large-scale programs and projects while ensuring that all project components are compliant with approved project documents, applicable laws and regulations and all work is performed safely and within legal requirements.

Daniel is core proficiencies include cost management, schedule management, quality assurance, contract administration, change order management and stakeholder engagement. Public sector clients include County of San Diego – Department of General Services, Department of Homeland Security, City of Vista and Palomar College.

Relevant Experience – Public Works

Department of Homeland Security, Construction Project Manager
- Supported client in managing lifecycle of new construction, capital repair, renovations and/or alteration from concept development, planning, execution, close-out and occupancy phases for various projects, such as:
  - El Centro Sector-Window Security Upgrades
  - El Centro Sector-Security Lighting Upgrades
  - El Centro Sector-Earthquake Repairs (Interior and Exterior)
  - El Centro Sector-Hazardous Material Abatement and Demolition of OIT Buildings
  - San Diego Sector-New Vehicle Maintenance Building ($3M)
  - Yuma Sector-AC Installation Upgrade and Replacement of Existing Split System
  - Yuma Sector-Parking Lot Canopy Repairs
- Provided management and oversight of the multi-phased modernization and reconstruction for the largest land Port of Entry in the United States with a budget of over $741M.
- Ensured Government requirements and regulations were implemented within each project (FAR & CBP Security and Design Guidelines), as well as the execution of daily Operational Impact Plans.
- Negotiated and coordinated project designs, specification packages, budget objectives and schedules with customer agencies, including development of scope of work, estimating, leading team meetings, and providing project oversight.
- Collaborated with multiple disciplines including all stakeholders and key leadership in various federal agencies, state and local governments, non-profits, community organizations, contracting officers/COR and special interest groups.
- Coordinated space management and/or build-out of leased or client owned space by evaluating cost, schedule, and performance through all phases of construction including Phase I reports and cost studies for new construction, repairs and alteration type projects

County of San Diego, Department of General Services, Construction Project Manager
- Managed JOC (Job Order Contracting) process for multiple capital improvement projects including developing scope of work, contractor cost proposal reviews, RFI, submittals and change order negotiations.
- Conducted asset management activities and performed real estate and environmental compliance assessments.
- Implemented energy savings audits and drought response measures at County owned or leased facilities.
Fallbrook, California - Construction Management
Community Health and Wellness Center

Daniel Silva

- Pepperdine University
- Rancho Santiago Community College District
- Riverside County Sheriff’s Department
- San Diego Unified School District
- Santa Monica-Malibu Unified School District
- Scripps College
Kunal Shah, EIT, LEED AP
Scheduler (As-Needed)

**Education**
Master of Construction Management, University of Southern California, Los Angeles, CA

Bachelor of Engineering in Civil Engineering, DDIT, Gujarat University, India

**Registrations**
Engineer-in-Training (EIT), Board for Professional Engineers, Land Surveyors and Geologists, State of California

LEED Accredited Professional (LEED AP), U.S. Green Building Council

**Affiliations**
Member, American Society of Civil Engineers (ASCE)

Member, Construction Management Association of America (CMAA)

Member, U.S. Green Building Council (USGBC)

Kunal is a seasoned construction management professional with over 20 years of experience in program management, project management, and program controls—18 of which has been within the public works sector. Kunal’s extensive experience includes forensic scheduling analysis, critical path analysis, time impact analysis, recovery schedules, cost and resource loaded schedules, among others, having served in management roles on large and complex multi-million and billion-dollar construction programs throughout Southern California.

With his experience successfully managing projects on behalf of owners and as a general contractor, Kunal has vast experience in delivering projects using various project delivery methods such as lease-leaseback, design-build, traditional design-bid-build, multi-prime, among many others. In addition to scheduling and controls, Kunal is highly proficient in programming, design management, construction management, cost management, estimating, contract administration, risk analysis and change order negotiation. His project portfolio includes over $400 million in campus facilities programs, as well as programmatic experience in excess of $9 billion.

**Relevant Experience**
- City of Carson, Water Pollution Control Plant ($60 million)
- Los Angeles CC District, Sustainable Building Program ($9.6 billion)
- Los Angeles Southwest College, Campus-Wide Bond Improvements ($404 million)
- West Los Angeles College, Campus-Wide Bond Improvements ($414 million)

Brianna has over seven years of experience in the construction field, all of which has been in the public sector arena. She has proven her value in construction by utilizing her project controls skills while working with Anaheim Union High School District, Orange Unified School District, and the City of Inglewood. As an excellent organized communicator, Brianna is an asset to any construction team.

Relevant Experience

City of Inglewood, Various CIP Projects
Reviewed and identified transfer and adjustments of the expenditure of special funds supporting Capital Improvement Projects; Assisted the Project Managers on project budget issues; Assisted the Project Managers with amendment exhibits to contracts; Created budget transfers and produced financial closeouts; Compared previous and current years CIP lists, identifying added Capital Projects for various fiscal years; Prepared detailed summaries of appropriation adjustments of Capital Projects for previous years; Assisted project team staff with A/E contracts, bid and contract planning; Assisted on project budget, schedule, and issues; Produced multi-year summaries of Capital Projects expenditures and completed projects

Los Angeles International Airport (LAX), Tom Bradley International $1.2 Billion Renovation Project
Reviewed/ submitted over 600 IIPP Safety Binders making sure necessary documentation and requirements were met in accordance with LAWA; Review RFI/s Submittals/COP’s; Compiled data and created yearly analysis reports for over 2,000 courses/orientations within and amongst contracting companies for using Microsoft Excel, Microsoft PowerPoint, and Adobe Acrobat; Reviewed, processed and input employee data for over 20,000 workers using Microsoft Access; Reviewed/ documented over 569 IIPP subcontractors onsite making sure standards adhered to Cal OSHA

Anaheim Union High School District, $250M Measure H Bond Program, Anaheim, CA
Brianna served as Project Coordinator at Anaheim Union HS District for the Districts $250M Measure H Bond Program. Responsibilities included assisting with project planning, funding tracking, Board of Trustee and Citizens’ Oversight Committee reports, design management and construction management. Evaluated contract change orders and amendments for impact on budget and schedule. Participated in change order negotiations. Conducted construction/project site visits for progress reporting. Analyzed actual expenditures versus budget performance. Coordinated and supported the processing and approval of construction change documentation including Change Directives, Change Order, Contractor’s Change Requests, and other documents, as required.

Orange Unified School District, $188M Measure S Bond Program, Orange, CA
Brianna provided support as Project Coordinator for the District’s first ever bond program. Assisted in review of submittal procedures, RFIs and monthly invoices. Responsibilities included validating invoices against executed agreements. Resolving any issues with consultants regarding outstanding invoices. Generating Project Reports addressing all aspects of project development and completion.
Michael Echelmeier, DBIA, LEED AP, Assoc. AIA
Constructability Review (As-Needed)

Education
Bachelor of Architecture, California Polytechnic State University, San Luis Obispo, CA

Certifications
DBIA Professional, Design-Build Institute of America
LEED Accredited Professional, U.S. Green Building Council
AIA Associate, American Institute of Architects

Michael has worked in the construction and design industry since 1989 and has been involved in all aspects of the design-construction process, including constructability reviews, planning, pre-design, cost estimating, design, scheduling, project management, and construction management. This experience has allowed Michael to obtain a complete understanding of construction methods and practices.

In his role performing constructability reviews, Michael is responsible for reviewing contract documents to ensure compliance with the program requirements, relevant codes and standards, and meet the objectives for the respective project. His objective is to identify and reconcile ambiguous and conflicting design elements and through the review, Michael may also conduct visual site inspections to help identify potential impediments to the design and construction process.

Project Specific Experience
Section 6  Project Specific Experience

The Proposer shall provide a description of the three (3) most relevant construction management contracts held by the firm. Preference will be given to construction management services for public agencies within the last five years. Please include:

a. Role of the firm.
b. Dollar value of the program.
c. Project description including the name of the Construction Manager.
d. Staffing.
e. Relationship to client.
f. Contact name, position, entity name, telephone number, facsimile number, email address.

Mountain View Community Center, Mountain View, CA

Role of the firm: Program and Construction Management

Dollar value of the program: $18.3 million

Project Description including the name of the Construction Manager: Cumming provided complete Program and Construction Management for an $18 million LEED Silver City Community Center with new ground-up construction and renovations to existing building, including: large community room; roads, parking, infrastructure and new stop light installation; day care center with outdoor children’s play area; walking paths and picnic areas; complete new landscaping and lighting for park areas.

Construction Manager: Franklin Dickinson– Cumming Management Group, Inc.

Staffing: Construction Manager/Project Director – Franklin Dickinson (Cumming Management Group, Inc.)
Project Executive – John Olsson (Cumming Management Group, Inc.)
Project Manager – Katie Bipes (Cumming Management Group, Inc.)

Relationship to client: Cumming has a great relationship with the City, having worked with the City for over four years.

Contact name, position, entity name, telephone number, facsimile number, email address: David Printy, Sr. Project Manager, City of Mountain View, 650.903.6162, david.printy@mountainview.gov
**Mendez High School Wellness Center, Los Angeles Unified School District**

**Role of the firm:** Program and Construction Management

**Dollar value of the program:** Program Value: $7,000,000,000 (Measure RR)
Project Value: $9,000,000

**Project Description including the name of the Construction Manager:** Cumming provided Project & Construction Management Services for the Manuel Arts High School Wellness Center project. This included the construction of a new single-story clinic building on the Los Angeles Unified School District Mendez High School campus. The wellness center provides medical, dental, and mental health services to the school and surrounding community.

**Construction Manager:** Artin Mgrtichian – Cumming Management Group, Inc.

**Staffing:** Design Manager – Bill Fellers (Cumming Management Group, Inc.)
Construction Manager – Artin Mgrtichian (Cumming Management Group, Inc.)

**Relationship to client:** Cumming has provided comprehensive project and construction management services to Los Angeles Unified School District’s Facilities Services Division for over 20 years.

**Contact name, position, entity name, telephone number, facsimile number, email address:** Issam Dahdul, Senior Facilities Development Manager - South Region, LAUSD Facilities Services Division – Asset Management 213.241.6478, issam.dahdul@lausd.net

**Delivery Method:** Design-Build

**Year Completed:** 2020

---

**Manual Arts High School Wellness Center, Los Angeles Unified School District**

**Role of the firm:** Program and Construction Management

**Dollar value of the program:** Program Value: $7,000,000,000 (Measure RR)
Project Value: $7,000,000

**Project Description including the name of the Construction Manager:** Cumming provided Project & Construction Management Services for the Manuel Arts High School Wellness Center project. This included the renovation of the existing single-story clinic and construction of a new adjacent single-story clinic building on the Los Angeles Unified School District Manual Arts High School campus. The wellness center provides medical, dental, and mental health services to the school and surrounding community.

**Construction Manager:** Artin Mgrtichian – Cumming Management Group, Inc.

**Staffing:** Design Manager – Bill Fellers (Cumming Management Group, Inc.)
Construction Manager – Artin Mgrtichian (Cumming Management Group, Inc.)

**Relationship to client:** Cumming has provided comprehensive project and construction management services to Los Angeles Unified School District’s Facilities Services Division for over 20 years.

**Contact name, position, entity name, telephone number, facsimile number, email address:** Issam Dahdul, Senior Facilities Development Manager - South Region, LAUSD Facilities Services Division – Asset Management 213.241.6478, issam.dahdul@lausd.net

**Delivery Method:** Design-Build

**Year Completed:** 2020
Modoc Healthcare District

Role of the firm: Program and Construction Management

Dollar value of the program: $38 million

Project Description including the name of the Construction Manager: Cumming was the project manager for the District for design and construction of a new, modern critical access hospital facility situated on a new site that is owned by the District adjacent to Highway 299. The Project consisted of a new steel-framed hospital facility (type 2A non-combustible construction), and a new steel-framed outpatient and support services building (type SA construction).

The new hospital has a building area of approximately 27,000-sq.-ft. and will consist of Registration; Admitting and Lobby; an 8-bed Nursing Department; 1 Operating Room; Central Sterile Supply and Processing; an Emergency Department; a Radiology Department with 1 RF, 1 CT, and 1 Ultrasound; Clinical Laboratory; Pharmacy; Dietary; Housekeeping; Laundry; and Storage. The outpatient and support services building is approximately 16,500-sq.-ft. and consists of Administration and Support Services, Outpatient Clinic, Physical Therapy, Clinical Laboratory, and Materials Management and Maintenance. The two buildings are physically attached from an operational standpoint, but physically separated by both fire and occupancy separations.

Cumming’s role was to assist the District with completion of the Project Program, procurement of the Design-Builder and other necessary construction, and to help the District oversee and manage the design and construction process during all phases of the Project, including commissioning.

Construction Manager: Richard Kasa - Cumming Management Group, Inc.

Staffing: Construction Manager – Richard Kasa (Cumming Management Group, Inc.)
Project Coordinator – Kristi Edwards (Cumming Management Group, Inc.)
Project Executive - Frank Fernandez

Relationship to client: Cumming has a great relationship with the Client.

Contact name, position, entity name, telephone number, facsimile number, email address: Kevin Kramer, CEO, Modoc Medical Center, 530.233.5883, k.kramer@modocmedicalcenter.org
County IDIQ Program, County of San Bernardino, CA

Role of the firm: Project and Construction Management

Dollar value of the program: Varies per project

Project Description including the name of the Construction Manager: Cumming has provided project/construction management, cost estimating, and scheduling services — including bid phase management, RFP development, and contract negotiations — to the County for various construction projects on an as-needed basis since 2005. These services have been completed over the course of several years.

The program also includes energy efficiency and conservation block grant projects, minor remodels, restorations, and ADA improvements throughout. Seismic work includes new footings, shear walls and drag beams throughout the building. The County engaged Cumming after two years of construction when the current construction manager and general contractor failed to meet original scheduled completion. In addition, Cumming was engaged as the Owner’s Agent to resolve all disputes and outstanding issues impacting the new scheduled completion date. After three months of Cumming leadership, all outstanding issues were resolved, and the schedule was improved by eight weeks.

Construction Manager: Varies per project

Staffing: Varies per project

Relationship to client: Cumming has a great relationship with the County and has been providing services to the County since 2005.

Contact name, position, entity name, telephone number, facsimile number, email address: Joel Garnica, Supervising Project Manager, 909.387.5224, joel.garnica@pmd.sbcounty.gov
Section 7

Proposed Methods to Accomplish the Work
Section 7 Proposed Methods to Accomplish the Work

Approach
Cumming specializes in construction management. We are 100% dedicated to protecting our client's interests through all phases of the design and construction, while understanding that a successful project is one that allows all involved entities to be successful. Cumming’s project specific construction management plan (CMP) will offer a defined approach to take the project from its current state through completion of all construction, closeout, and initial occupancy activities. The critical factors to successful projects include:

- Well-defined goals and milestones
- Extensive, thorough early planning
- Good leadership, management, and supervision
- Positive and effective relationship with end-users, CMAR, subcontractors, design professionals and consultants.
- Proper project team chemistry
- Quick response to changes/adaptive to potential funding changes or requests

Our proven management work plan incorporates each of these critical success factors. Municipal projects and programs comprised of renovations, additions, and new construction not only require a tremendous dollar investment but also a great deal of planning, design, and management to see projects through from the moment the first funds are available to the day they are completed.

Effective Public Engagement
Working with the District and Stakeholders, our team will create a Community Involvement Plan. Together, we will create a toolbox of options that provide real time, valuable project information to the community. Specifically, some of the tactics we recommend include:

- Timely progress updates on the District website.
- Potentially creating a public-facing project website where community members can go to find up-to-date news about the project, see progress photos, find contact information for public liaisons or community representatives, and more. Cumming has participated in the development of numerous such websites and can lead this effort on your behalf.
- Live and virtual community events held at multiple locations, times and languages.

Pre-Construction Phase
Our holistic approach during the Preconstruction Phase is crafted to create a seamless transition from design through preconstruction, construction, close out, and warranty. We include team members from the Design Team, Cumming’s Operations Team, and most importantly, the Facilities and Construction department for input prior to the bidding documents being issued. This creates team alignment and certainty that all expectations and priorities will be clear and achieved.

Our team brings extensive experience with projects on occupied sites, requiring complex phasing and logistics to ensure site safety.

Developing Value Engineering Options
To develop reliable, practical value engineering options, Cumming leverages the “lessons learned” from our current workload. We are involved in over 400 projects per month, providing us with significant data to evaluate each project and determine the best way to balance cost and quality in a variety of scenarios. Utilizing our own vast cost database, we will ensure that all of the reported construction costs are benchmarked—on a cost per square foot (or other functional unit) basis—against other comparable facilities “leveled” for time and location. This will demonstrate where specific cost drivers or opportunities exist, as well as validate that reported costs are in line with industry standards.

Constructability Reviews
The ideal time to mitigate design conflicts is in the preconstruction phase prior to bid. Constructability reviews are critical to time, cost control, and claims avoidance. We will assign multi-disciplinary professionals to assess the Contract Documents for clarity, integration of plans and specifications, constructability of details and absence of ambiguities. Our team members are able to review systems and details serving as a “second set of eyes” to ensure that the drawings and specifications put out to bid are complete, constructible, and of the highest quality. Our reviews will specifically address issues such as:

- Constructability of construction details
- Lead time for materials and equipment
- Reasonableness of performance of work sequence, interface relationships and periods
- Site access, restrictions, staging areas, availability of utilities for construction, and safety plans for pedestrian and vehicular traffic for ongoing operations
- Coordination within and between disciplines relative to the plans and specifications
- Assurance that references to statements such as “designed by others” are addressed
Our goals in performing Interdisciplinary and Constructability Reviews are:

- A reduction in the amount of change orders
- A reduction in delays caused by change orders
- A reduction in Requests for Information (RFIs)
- A savings in construction administration time and effort
- A smoother, non-adversarial relationship between the parties involved
- A better construction project at final delivery

Throughout the process, we will periodically review construction documents, plans, and specifications to achieve project goals.

**Staff / Facilities Coordination around Sequencing, Safety, and Logistics**

Our team will work closely with your staff and facilities group. We will carefully plan out the sequencing, safety, and logistics prior to the start of construction. The agreed upon strategy will be incorporated in the construction bid documents to ensure that the proposing contractors are aware of logistical and coordination constraints prior to submitting their bids. This ensures claims are minimized as they relate to site logistics and coordination efforts.

**Working with all stakeholders, Cumming will develop a phasing plan to address your project’s unique phasing requirements, interdependency of different needs, swing space constraints, path of travel, evacuation routes etc.**

**Cost and Schedule Control**

We will regularly evaluate the progress of each construction contract to forecast potential budget and schedule variances. Cumming cost and schedule reporting will identify problems and proposed solutions: including schedule and cost status and show time and cost to complete the contract. The monthly progress evaluation will compare actual expenditures against budget, and as-planned performance against actual performance. The reports will also summarize the preceding month's developments, plans for the current month, future plans, requests, recommendations, and general comments.

**Project Controls**

Cumming is a leader in the implementation of project controls, and we have staff members that are experts in all the leading cost and project management systems. Our project controls philosophy is summarized by the following four points:

- Proper and early planning.
- Real-time monitoring and forecasting.
- Effective and timely communication of status and changes.
- Implementation of strict controls and actions to correct problems.

Our team will complete a review of the accounting system used by the District in order to integrate or transfer data to the project accounting and management system. We will then review all cost codes used by the District's accounting department and create a map to track costs by major cost buckets including design, construction, FF&E, project management cost, inspection and testing cost, and various other soft costs.

Cumming will establish project accounting and management systems by using industry standard software based on District's needs; develop master budgets for all bond projects broken down by major cost buckets; track expenditures by

---

Our team works collaboratively and transparently with client stakeholders to deliver services that achieve our client’s goals and objectives.
major cost buckets and forecast additional anticipated cost by bucket to derive estimate at completion cost for each project; prepare anticipated cost reports for all projects and submit it to the District for their review; develop construction estimate based on SD, DD and CD drawings; validate that the design is within the budget; use construction estimate to update project overall budget (hard + soft costs) to show the District any potential savings/overruns, and prepare value engineering options for the District.

Project Schedule
Our team believes in developing both a summary and a detailed schedule approach for time management control. Summary schedules, by design, inform and update senior management, while detailed construction schedules provide the day-to-day operational tools for time management.

Pre-Bid and Pre-Construction Meetings
Our team will prepare pre-bid and pre-construction agendas and facilitate pre-bid conferences for each project. Contract Documents will be clarified, and bidder inquiries will be addressed at each meeting. Our job is to clearly communicate the work with bidders. All questions resulting from the pre-bid meeting will be recorded and responses will be distributed to bidders.

Bid Phase
Methodology During Bid Phase
Our proposed team members are fully trained in construction procurement. After the identification of bidders and release of the solicitation package, our team conducts project site visits and documents any questions or new data provided. If warranted, we amend the solicitation to include that new information. Our team maintains strict control of the information process during the pre-bid phase to avoid any confusion.

One area of focus is on the change order process. We have found that when contractors understand the fairness of the change order and payment process, they generally bid lower because they do not have to put as much management reserve in their bids. Our evaluation process includes an assessment of both the bid and the firm’s ability to successfully perform the contract. Cumming staff are extremely proficient in performing or assisting in the evaluation of cost proposals and determining the most responsive and responsible bidder.

Construction and Closeout Phase
Typical concerns that must be addressed during construction include construction phasing, maintaining paths of travel around construction zones, scheduling of certain contractor activities that may impact the site, noise and dust control, vehicular access and parking, contractor staging areas, and coordination of utility shutdowns, if needed.

We will work diligently to keep you updated on progress and apprised of forecasted activities. Our team will become familiar with the general conditions and technical sections of the contract specifications and verify that the provisions of the contract are clearly understood and enforced during the construction phase. We will log and track project correspondence, project submittals, requests for information (RFIs) and other project documentation.

Construction Sequencing
The effective sequencing and scheduling of construction work around existing facilities will begin in the design phase. Known conditions that may influence the contractor’s schedule will be shared with the prospective bidders at the pre-bid walkthroughs and will be further clarified at the pre-construction meeting held with the successful low bidder.

Our team will closely review the contractor’s schedule submittal to make certain that all required sequencing and milestones are shown. By closely monitoring the contractor’s progress and work plan, we will be able to make recommendations as needed to adjust sequencing, work, or traffic patterns to minimize disruption to project activities.

Testing and Inspections
During construction, Cumming will systematically verify that reviews, certifications, inspections and tests are

Safety is Always at the Forefront
Through many years of working around occupied sites and on campus environments, we understand special care needs to be taken to ensure the safety of all parties. As part of the project kick-off meeting, we will work with you to create a site specific safety plan. We are very sensitive to working in and around an occupied facility.
being performed. A good quality assurance plan includes documenting all inspections, identifying items that have been satisfactorily inspected and targeting those requiring corrective action. At the beginning of construction, each inspector will review the contract documents outlining the most important elements to include in the quality control data. From the database, we can develop quality control checklists to manage startup, acceptance, and closeout procedures with the all required inspectors. At weekly meetings, the contractor’s completed activities will be discussed and their quality control effectiveness measures evaluated. Where improvements are needed, the contractors are advised to implement them in time for upcoming activities.

Comprehensive and accurate as-built drawings are essential to the successful closeout of construction projects. Cumming believes that regularly updated as-built drawings are achievable when they are required for each payment application. Our team will verify that each contractor keeps its as-built drawings up to date before approving their portion of the work for payment. Any modifications to the contract documents must be posted on eDocs before submittal of any payment requests.

Furniture, Fixtures, and Equipment
Our team can assist in FF&E procurement. If the owner chooses, we have the ability and resources to coordinate development of detailed needs, cost, purchases, installation, and move in of all furniture, fixtures, and equipment. Using FF&E planning at the beginning of a project assures that the architect has provided space and power for unique equipment, requirements often found in educational classrooms. We bring a current knowledge of piggy-back purchase opportunities and preparation of bid packages for FF&E not available through piggy-back contracts.

Commissioning
Cumming will ensure that District maintenance staff receives both appropriate orientation and instruction on new equipment and fixtures and all necessary maintenance manuals. Commissioning proves that the building and its systems work as intended. To accomplish this, our team will conduct a series of field meetings with District maintenance representatives and equipment/fixture manufacturers’ representatives to conduct field training and orientation.

Post-Construction
Our team can assist the architect, engineers, consultants, and all end users in developing project punch lists and verifying completion of all items. In cases where an existing facility is being remodeled, documentation of existing conditions must be performed prior to construction to confirm fairness to all parties and facilitate completion of the punch list work. If the project requires occupancy prior to completion of minor punch list items, we will coordinate with the contractor to complete the punch list work during times when activities will not be disrupted.

Quality Control/Assurance Procedures
We have a simple yet rigorous approach to obtaining and maintaining quality for our clients. The primary ingredients are teamwork and communication. Our approach is guided by the following principles:

- **Quality is conformance to requirements** — If you don’t know the requirements, conforming to them is tough.
- **Maintain consistent quality throughout the process** — Requirements of each phase are set by the work products of preceding phase; thus poor quality work products limit the following phase.
- **Measure early and often** — Our work processes focus on quality assurance that our deliverables conform to the contract requirements. We have found that the potential for surprise is inversely proportional to the frequency of measurement. Therefore, we will check the progress and the quality of the work often and make small corrections to avoid large corrections.

One of the most important elements of the quality assurance and control tasks is team-building. This activity is part of a comprehensive assignment kickoff to develop a common understanding of the project’s goals and objectives, develop clear lines of communications, and to clearly understand the scope of work to be accomplished. Once these issues are aligned in everyone’s minds, a quality process can be implemented.

Our quality assurance is the continuous application of effective processes within a team environment to achieve conformance to project requirements. The most meaningful measure of quality is client satisfaction. We will assign a senior member of our team the responsibility of Quality Assurance officer and that individual will be responsible for ensuring quality on the projects associated with this solicitation.

Knowledge and Understanding of Local Environment
Section 8  Knowledge and Understanding of Local Environment

Explain the knowledge and understanding of working in San Diego County.

Cumming is very knowledgeable with working with the County of San Diego, and the Cities that it encompasses. We are knowledgeable with local agencies regulations and policies, local environmental documentation requirements, geotechnical conditions in the project area, and local building codes and other technical criteria. A partial listing of our San Diego County experience:

Section 9

Fee Schedule
Section 9  Fee Schedule

Provide a listing of the proposed personnel, their classifications, and their hourly rates, including all overhead and profit.

Cumming’s fee philosophy for professional services is based on our understanding of the District’s need for seasoned and qualified professionals at a sensible cost. We operate as an extension of the district’s staff to ensure full transparency, collaboration, and that our team members offer the highest level of expertise to successfully accomplish any District task.

HOURLY RATES
Cumming has provided hourly rates below to provide Construction Management Services for the Community Health and Wellness Center project. Our proposed hourly rates are inclusive of all overhead and profit.

AS-NEEDED SERVICES
Cumming is readily prepared to provide additional support staff and services on an as-needed basis, as well as a preventative measure to mitigate any unforeseen exposures that may impact project budget, schedule, and/or quality, if and as required by the District. As such, Cumming has provided hourly rates in the table below for additional as-needed support staff and services that are readily available to support the project, as necessary:

REIMBURSABLE EXPENSES
Any reimbursable expenses incurred during Cumming’s performance of services, including, without limitation, all costs for personnel, travel beyond twenty-five (25) miles of the District’s geographic limits, per diem expenses, printing and/or shipping of deliverables will be billed at actual costs with 0% mark-up.

On-site facilities are generally provided by the District or part of the contractor’s general conditions. If requested, these costs would fall under the reimbursable expenses category and shall be billed at cost with 0% markup. Client shall reimburse for any out-of-pocket expenses incurred which are authorized in advance and in writing.

RE: Proposal for Construction Management Services
Fallbrook Regional Health District: Community Health and Wellness Center

Dear Ms. Mason:

Attached for your review is Fulcrum, LLC, a VERTEX Company's (Fulcrum) proposal response to the Request for Proposal for Construction Management Services dated August 2022.

We would like to thank you in advance for both the opportunity to provide this proposal and the time extended to us on our August 31, 2022, site visit.

We look forward to continuing this process and look forward to any future interviews that we may schedule.

We trust this meets with your immediate requirements, and thank you for considering the services of Fulcrum on this important project.

Sincerely,

Fulcrum LLC, a VERTEX Company

Bradley W. Lancaster, CPC
Senior Project Manager

JL Summerlin, CPC
Assistant Vice President
SECTION 1: EXECUTIVE SUMMARY

In response to the Request for Proposal for Construction Management Services dated August 2022 (the RFP), Fulcrum, LLC, a VERTEX Company (Fulcrum) is honored to provide this Proposal for the Community Health and Wellness Center for the Fallbrook Regional Health District in Fallbrook, California. We believe that this Proposal addresses all requests and submission requirements contained in the RFP and we trust that Fallbrook Regional Health District will find Fulcrum to be well-qualified to provide the proposed services.

We believe that Fulcrum brings to Fallbrook Regional Health District a unique opportunity – the opportunity to utilize Fulcrum’s local expertise and talent that is backed by a top Architecture, Engineering, and Construction (AEC) firm, VERTEX. We believe this unique combination will provide the project with a depth of multidisciplinary resources that will benefit the project, and position the project for a positive outcome.

Fulcrum is excited and honored to be considered for this opportunity and is ready to proceed upon execution of a suitable agreement and upon notice from Fallbrook Regional Health District to proceed.
SECTION 2: FIRM INFORMATION AND EXPERIENCE

Since 2009, Fulcrum has provided clients with exceptional quality project services across North America. Since 1995, VERTEX has provided engineering, environmental, construction, and digital services to clients across the same footprint. The combined synergy of Fulcrum and VERTEX provides clients with an unparalleled platform of experience and multidisciplinary staff for a positive project-delivery experience.

The Fulcrum Team
Established in 2009 and headquartered in Scottsdale, Arizona, Fulcrum is a full-service construction management and owner’s representation firm. Fulcrum is well-regarded for our exceptional quality and service across North America. As a multi-disciplined professional services firm, Fulcrum has active projects across North America, a platform of offices throughout the United States, and is laser focused on quality and value. Fulcrum’s staff includes construction, design, engineering, and accounting professionals providing the ability of Fulcrum’s 60 staff members to draw upon the collective experience and knowledge of the entire Fulcrum team.

The VERTEX Team
VERTEX is an AEC firm that offers forensic, construction project advisory, engineering, environmental, and digital services throughout the globe. ENR currently ranks VERTEX as a top engineering design firm, construction/program management firm, and environmental firm. VERTEX is also ranked as a “Best Firm to Work For” by Zweig, which underscores VERTEX’S commitment to its employees. VERTEX’S blend of traditional engineering, environmental, construction, and digital services bolsters their ability to handle a multitude of design and construction assignments. VERTEX was founded in 1995 as a full-service construction and environmental services firm and currently has over 750 professionals with U.S. offices in Massachusetts, California, Colorado, Connecticut, Florida, Hawaii, Illinois, Kansas, Michigan, Missouri, New Jersey, New York, North Carolina, Pennsylvania, Texas, Washington, and Washington, D.C. VERTEX’S corporate headquarters is located in Weymouth, Massachusetts.

Past Public Project Work
Fulcrum, and our parent-company VERTEX, has a demonstrated track-record of successful owner’s representation on public projects. Selected projects are as follows:

Police and Fire Stations - Randolph Massachusetts
Performed in 2014, VERTEX served as the Owner’s Project Manager for the renovation of the Randolph Police Station, which is connected to the Town Hall and was no longer adequate for the needs of the Town. The $4.4MM renovation and addition added much needed office and storage space and brought the facility up to code. The project occurred in five phases due to the activity in the police station and the Town Hall. Phase 1 included the construction of the new addition and main entry to the police station, as well as a new cell area. The remaining phases consisted of code upgrades, interior renovations, and state of the art equipment and technology. VERTEX’S services included advising the Town on the selection of the architectural firm for the project, overseeing the work of the architect during the design process, attendance at public meetings, budget preparation and review, bid process oversight, and on-site supervision of construction activities, and
VERTEX served as the Owner’s Project Manager for the $5.5MM construction of the new North Randolph Fire Station. The new fire station facility houses three apparatus bays, dispatch and communications, offices, and dormitory space for on-duty firefighters. The project also includes upgrades to an abutting dentist’s office, which received a new entry way and landscaping upgrades. The project was responsible for the disconnection and reconnection of all utilities to keep the dentist’s office fully operational throughout the duration of the project. VERTEX’s services included advising the Town on the selection of the architectural firm for the project, overseeing the work of the architect during the design process, attendance at public meetings, budget preparation and review, bid process oversight, onsite supervision of construction activities including being the direct contact with the dentist’s office for any issues throughout the course of the project, coordination of electrical service for both the fire station and the dentist office, gas service for the dentist office, coordination for removal and relocation of traffic lights and traffic control, as well as coordination with DPW and their work associated with the mentioned utilities.

Dracut Town Hall New Construction – Dracut, Massachusetts
Performed in 2012, VERTEX served as the Owner’s Project Manager for the construction of the Town of Dracut’s new 22,500 square foot town hall building. Phase One of the project consisted of the demolition of two single-family homes, site clearing, infrastructure to support the new structure, and the construction of the new building. Phase Two included the relocation of town offices into the new town hall building, reconstruction of a roadway running through the site, reconstruction of an existing parking lot, and landscaping.
Throughout the course of the project, VERTEX’s services included budget creation and management, schedule management, records management, designer coordination, constructability review, value engineering, pre-bid conferences, onsite supervision of construction activities, change order review and negotiation, monthly reports, health and safety reviews, attendance at public meetings, punch list oversight, owner training sessions, and review of closeout documentation and warranties.

Chelmsford North and Center Town Halls – Chelmsford, Massachusetts
Performed in 2010 and 2011, VERTEX served as the Owner’s Project Manager to the town of Chelmsford for the restoration of the North and Center Town hall buildings. The project involved the historical renovation of these two buildings as both were originally constructed in the 1800s. The first building, the Center Town Hall, was constructed in 1879 and currently serves as the Chelmsford Center for the Arts. The second building, the North Town Hall, was constructed in 1853 and now serves the community as after-school space for the middle-school students.
Restoration work included: structural, architectural, and mechanical components, as well as ADA upgrades to ensure accessibility throughout the buildings.

Please see Attachment B for a representative listing of Fulcrum projects.
SECTION 3: PROPOSED PROGRAM MANAGEMENT TEAM

Fulcrum is pleased to provide a unique opportunity to Fallbrook Regional Health District – key local team members, experienced in both owner’s representation and project management in the San Diego area, leveraged and supported by the one of the premier full-service construction management and owner’s representation firms in North America (Fulcrum) and one of the premier AEC firms in North America (VERTEX).

Key Team Members

Bradley W. Lancaster, CPC – Senior Project Manager

With over 25 years of experience in the construction and real estate industry, Mr. Lancaster is a project management professional experienced working in fast-paced and high-pressure environments and has successfully performed in a wide range of roles, including owner representation and general construction.

Mr. Lancaster has managed logistical and capital expenditure programs in retail, health care, food service, sports facility, education, aviation, and office sectors. Mr. Lancaster is proficient in managing the entire development process, including site selection, due diligence, budgeting, construction cost management, design guidance, construction service procurement, construction oversight, and commissioning.

Mr. Lancaster has acted as an owner’s representative, responsible for the entire development process, for the following San Diego County projects:

- Comerica Bank – Vista
- Comerica Bank – Mira Mesa
- Comerica Bank – La Mesa

Mr. Lancaster is a fourth-generation Californian and has earned a Master’s in Business Administration and a Bachelor of Science in Construction from Arizona State University. Mr. Lancaster resides in San Diego and Mr. Lancaster’s resume is included in the Attachments section of this report.

Will Ellis – Project Manager

With over six years of experience, almost exclusively in the San Diego County area Mr. Ellis is an integral team member and has extensive experience delivering Construction Project Management Services, Plan and Cost Reviews, and Construction Draw Review Services.

Mr. Ellis has acted in a Project Manager capacity for the following San Diego County projects:

- Temecula Health Care
- Ballpark Village
- CedarStreet Park Boulevard Flats
- Gaylord Hotel and Convention Center

Mr. Ellis holds a Bachelor of Social and Behavioral Sciences degree in Resource Economics with a concentration in Managerial Economics from University of Massachusetts Amherst along with numerous Professional Certificates from San Diego State University. Mr. Ellis resides in San Diego and Mr. Ellis’ resume is included in the Attachments section of this report.
The Fulcrum Team
Established in 2009 and headquartered in Scottsdale, Arizona, **Fulcrum** is a full-service construction management and owner’s representation firm. **Fulcrum** is well-regarded for their exceptional quality and service across North America. As a multi-disciplined professional services firm **Fulcrum** has active projects across North America, a platform of offices throughout the United States, and is laser-focused on quality and value. **Fulcrum’s** staff includes construction, design, engineering, and accounting professionals providing the ability of **Fulcrum’s** 60 staff members to draw upon the collective experience and knowledge of the entire **Fulcrum** team.

The VERTEX Team
VERTEX is an AEC firm that offers forensic, construction project advisory, engineering, environmental, and digital services throughout the globe. ENR currently ranks VERTEX as a top engineering design firm, construction/program management firm, and environmental firm. VERTEX is also ranked as a “Best Firm to Work For” by Zweig, which underscores VERTEX’S commitment to its employees. VERTEX’S blend of traditional engineering, environmental, construction, and digital services bolsters their ability to handle a multitude of design and construction assignments. VERTEX was founded in 1995 as a full-service construction and environmental services firm and currently has over 750, yet now over 800 including **Fulcrum**, professionals with U.S. offices in Massachusetts, California, Colorado, Connecticut, Florida, Hawaii, Illinois, Kansas, Michigan, Missouri, New Jersey, New York, North Carolina, Pennsylvania, Texas, Washington, and Washington, D.C. VERTEX’S corporate headquarters is located in Weymouth, Massachusetts.
SECTION 4: PROJECT SPECIFIC EXPERIENCE

Representative project experience is important. Of equal importance are the skills developed and maintained in executing a wide variety of project types as an Owner’s Construction Manager. While the combined public work experience of both Fulcrum and VERTEX is extensive, the selected projects below are only a snapshot of the combined public and private projects where Fulcrum and VERTEX have provided Owner’s Construction Manager services.

Relevant Public Project Experience

Medway Department of Public Works – Medway, Massachusetts
Completed in December of 2020, VERTEX/Compass served as Owner’s Project Manager for the new Department of Public Works Building in Medway, Massachusetts. The new multi-building facility project includes a 33,000 SF office/vehicle storage building; a vehicle parking canopy; a salt shed and all related site work. The new office/vehicle storage building will include fit-outs for administrative office spaces, crew support spaces, including locker rooms, department workshop spaces, vehicle maintenance bays, a wash bay, and parking for the Department’s front line vehicles.

- Role: Owner’s Project Manager
- Dollar Value of Project: $11 Million
- Staffing: Part-time
- Client Contact: Allison Potter, Assistant Town Manager, Medway DPS, 508-533-3264, apotter@townofmedway.org

Walpole Council on Aging – Walpole, Massachusetts
Completed in December of 2018, VERTEX/Compass served as Owner’s Project Manager for the Town of Walpole for the new Walpole Council on Aging Building project. The new Walpole Council on Aging Building, to be known as the “South Street Center,” was constructed on the Town’s property at 50 South Street as part of the Town’s efforts to re-develop the former industrial site. The Center shares the site with the Town’s newly constructed Police Headquarters building and is on the southerly part of the site overlooking the Neponset River watershed. The new, multi-story, fully accessible, building is approximately 13,000 SF and offers a variety of spaces providing local seniors with services focused on socialization, nutrition, and fitness. The Center has a large multi-purpose room capable of holding a variety of functions including exercise classes, musical or speaking performances, and large group meals. The Center also houses administrative offices, information areas, fitness areas, social gathering spaces, and activity/classroom spaces.

- Role: Owner’s Project Manager
- Dollar Value of Project: $7.5 Million
- Staffing: Part-time
- Client Contact: Jim Johnson, Town Manager, 508-660-7304, jjohnson@walpole-ma.gov

Hanlon Deerfield Elementary School - Westwood, Massachusetts
Schedule for completion in February of 2025, VERTEX/Compass is serving as the Owner’s Project Manager for the Town of Westwood. VERTEX/Compass managed the feasibility study for the Town’s plan for its new elementary school to replace the existing Hanlon School and its consideration of consolidating two elementary schools into a single school. Currently, VERTEX/Compass is working with the Town of Westwood
on the new Hanlon Deerfield Elementary School. This new 560 student, $88MM, 113,000 SF school will have modern education spaces and community amenities including a large gym and 11x7 soccer field for the Town. It will be a Net Zero Ready school with a project Energy Use Intensity of 22 KBtu/SF/yr. When completed, it will be one of the most energy efficient schools in Massachusetts. The project will have one of the best HVAC systems to address indoor air quality and will exceed the CDC standard for dealing with pandemic such as COVID.

- Role: Owner’s Project Manager
- Dollar Value of Project: $88 Million
- Staffing: Part-time
- Client Contact: John Cummings, Town Permanent Building Committee Chair, 781-326-7500
SECTION 5: PROPOSED METHODS TO ACCOMPLISH THE WORK

As the Owner’s Construction Manager, Fulcrum will serve to represent the interests of the Client throughout all phases of the project. We seek to create a collaborative project team, where Fulcrum serves as the link between the Owner, Design Team, General Contractor, Subcontractors, consultants, and vendors or suppliers. Fulcrum and VERTEX bring over 35+ years of experience as a company to successfully manage the project and ensure the project goals are met.

It is Fulcrum’s understanding that the objective of this project is to provide oversight for all aspects of the project from schematic design through final closeout, including management of the design process, overall project schedule, procurement process general contractor selection, construction, etc. Fulcrum will work with the Client through every phase of the project to ensure successful completion of the work and contract conformance by qualified general contractors. Please see below for an overview of Fulcrum’s anticipated services throughout the project.

General Construction Management Services

Pricing Verification: Fulcrum will work with the Client to review and confirm the feasibility of the overall project budget inclusive of all anticipated construction costs, soft costs (i.e. design services, project management, etc.) and contingencies. Fulcrum can also help develop an initial cash flow report that includes construction costs and incidentals. This information will be of value to the Client as they plan for payments throughout the project.

Schedule Development: Fulcrum will facilitate and develop an overall project schedule with input from the Client, stakeholders, design team, and other project team members. The schedule will provide the project team the guidance for project deliverables and provide stakeholders with realistic delivery expectations.

Communication & Document Control Procedure: Fulcrum will develop a communication and document control procedure that will detail the responsibilities and lines of communication amongst the project team (i.e. Client, Design Team, Contractor, Subcontractors, consultants, and vendors or suppliers) and will establish the procedure for correspondence, document control, General Contractor Submittal Logs, Request for Information (“RFI”) Logs, Change Order and Potential Change Order Logs, and other tracking logs as needed. Fulcrum can create meeting agendas and attend/present as needed at all applicable project/stakeholder meetings that the Client deems necessary.

Project Records Management: Throughout all phases of the project, Fulcrum will maintain a detailed project record for the Client. This project record will typically include the following documents: executed agreements between the Client, Architect/Engineers and the General Contractor, copies of performance and payment bonds, a master list of permits, certificates of insurance, licenses and approvals for the project, daily reports, project schedules, all construction contract documents (i.e. plans and specifications), submittals, ASIs and shop drawings, correspondence with all parties, construction correspondences (including Requests for Information, Construction Change Directives, etc.), and financial information (including Payment Applications, Change Orders, Change Order Requests, and Proposal Requests). Furthermore, Fulcrum’s oversight of the document controls will result in the timely processing of time-sensitive documents such as
submittals and payment requisitions.

**Design Phase Services**

During the design development phase of the project, **Fulcrum** will work to facilitate a constructive relationship between the Client and the Design Team. As the Construction Manager, **Fulcrum** will review the documents that are prepared and work with the Architect to make sure that the Client’s needs and intent are incorporated into the overall design.

**Constructability & Cost Estimate Review:** If required, **Fulcrum** will conduct constructability reviews of Design Development Drawings before they are distributed to potential bidders for the project. The purpose of the constructability review is to try to identify immediate design issues, areas that exhibit potential for future defect/long-term issues, and areas of the design that could be the basis of a Change Order from the General Contractor so that they may be clarified and discussed.

**Strategic Contracting:** If required, **Fulcrum** will provide the Client recommendations regarding general contractor contract form and structure and also provide recommendations regarding the strategic use of alternates and allowances.

**Value Engineering:** Value Engineering for **Fulcrum** is a project-long activity that starts the day we receive preliminary plans to the day construction activities are complete. If requested, **Fulcrum’s** Project Manager and the Designer can each spend time critically reviewing and discussing the plans with the Client in order to identify areas for potential cost savings and alternatives. Using RSMeans estimating software, we can efficiently run alternative costs for the project.

**Construction Document Production and Permitting:** If required, **Fulcrum**, will monitor the production of Construction Documents, manage the timely submission to San Diego County and other jurisdictions having authority, review jurisdictional comments, and review jurisdictional resubmissions to ensure that the project avoids unnecessary review cycles.

**Construction Phase Services**

“Time is of the Essence” is **Fulcrum’s** approach in meeting an aggressive construction schedule. Not only will we strive to meet your objectives, we will make it a priority to improve upon the schedule and accelerate completion. Less time on-site results in additional cost savings to the Client. Our services during construction will include the following:

**On-Site Project Representation:** **Fulcrum** will provide the requisite on-site presence during the construction phase of this project, dependent upon the needs of the Client. **Fulcrum’s** onsite Project Representative will monitor construction to ensure compliance with contract plans and specifications, monitor time and materials work, provide weekly logs and photographic documentation of the project, and maintain project record documentation. Depending on the amount of **Fulcrum’s** presence/involvement onsite, the weekly log may include a record of weather, a summary of the General Contractor’s work onsite, number of workers, worker sign-in sheets, visitors to the site, safety status of the project, equipment and equipment utilization, material and equipment deliveries, non-compliance with safety procedures and issuance of any safety violation notifications, accidents, general description of work performed and quality of work, visits of code enforcement officials and any resulting reports or orders, verbal instruction to interpretations given to the General Contractor, payment items, delays, deficiencies and field problems.

**Project Meetings:** **Fulcrum** will assist in coordinating pre-installation meetings prior to the commencement of major scheduled activities that require coordination between various disciplines. In order to keep the Client informed on project matters, **Fulcrum** will hold meetings, prepare agendas, provide updates of project
progress, answer questions and receive feedback. Additionally, **Fulcrum** will advise the Client on project budgeting, schedule, project cash flow, design input, and project scope issues. Furthermore, at these meetings, **Fulcrum** will provide the Client with monthly progress reports, updating the Client on any issues.

**Payment Application Review:** **Fulcrum** will review the General Contractor’s monthly Payment Applications and make recommendations to the Client for payment. With our onsite presence, **Fulcrum** will ensure that the amounts requisitioned for are commensurate with the work completed to date, and that the Client’s financial interests are protected. **Fulcrum** will also ensure that all required Conditional and Unconditional Lien Waivers are supplied by the General Contractor and Subcontractors with each Payment Application.

**Schedule Review & Management Services:** **Fulcrum** will provide Schedule Review and Management services during construction. Once the General Contractor provides a Critical Path Method (“CPM”) Schedule for construction, **Fulcrum** will analyze the project schedule and relay any deviations to the Client. **Fulcrum** will work with the Design Team and General Contractor to help ensure adherence to the schedule by all parties. **Fulcrum** will also help to identify any potential long-lead items at the onset of the project to mitigate potential delays. **Fulcrum** and VERTEX have been repeatedly used to turn around and complete dozens of defaulted construction projects; this experience sets us apart from other firms as we have seen what can make a project become distressed and, as such, can often curtail issues that have doomed other projects.

**Change Order Review & Negotiation:** **Fulcrum** will review all Potential Change Orders on the Client’s behalf and make recommendations based on material costs, material quantities, labor rates, and labor quantities. Change Order pricing may be analyzed using RSMeans and historical cost data to provide a fair and reasonable analysis. **Fulcrum** will initiate, conduct and document negotiations of Change Orders with the General Contractor, make recommendations to the Client for acceptance or rejection, and prepare and finalize any documentation required for the processing of Change Orders, including documentation to support or reject the change.

**Construction Health & Safety:** **Fulcrum**’s approach towards safety and security typically emphasizes the safety procedures of general contractors and construction personnel on-site. We will monitor the General Contractor’s safety programs, develop a logistics plan, and locate fences and barricades with the General Contractor to ensure the safety of the development residents and guests. We will review the General Contractors’ work and be sure the contract documents are specific in their responsibility for a safe work environment. **Fulcrum** has the ability to consult on the general contractor’s Health and Safety Program (HASP). Lack of proper oversight in the quality or safety at any stage of a project can be devastating. Aside from the obvious risk to public and worker safety, an accident can potentially delay project development and increase project costs.

**Punch List:** **Fulcrum** will participate in the creation of the project’s final punch list, ensuring that all aspects of the project are completed satisfactorily before final payment is made to the General Contractor. **Fulcrum** will coordinate a walkthrough with the Client and the Design Team for review of the work in place. In conjunction with the Design Team, **Fulcrum** will prepare our own detailed punchlist. As the punchlist work is completed by the General Contractor, **Fulcrum** will assist the Design Team in reviewing completed work.

**Closeout:** After ensuring all punchlist work is signed off on by the Client and Design Team and all closeout documentation and training has been completed, **Fulcrum** will review all open change orders and credits to process all general contractor final payments, and ensure receipt and delivery of all lien releases, certified payroll (if applicable), labor compliance affidavits and financial closeout documentation. Having tracked project financials from the inception of the project, **Fulcrum** will be able to provide a complete summary of project expenditures.
SECTION 6: KNOWLEDGE AND UNDERSTANDING OF THE LOCAL ENVIRONMENT

For over 10 years, Fulcrum has enjoyed the opportunity to work and live in San Diego County. During that span, Fulcrum has gained valuable insight into the San Diego market that Fulcrum is eager to apply to the project.

San Diego Residencies
Fulcrum is proud to note that all proposed Fulcrum staff for the project are residents of San Diego. Fulcrum understands that residency is an important common thread in stakeholder, jurisdictional, and project delivery team interaction and is pleased to note that Fulcrum staff can share in this experience.

Fulcrum San Diego Presence
Over 10 years ago, Fulcrum recognized the importance of a permanent footprint in San Diego. As a result, Fulcrum opened its first office in San Marcos. Understanding the importance of a San Diego presence, and furthering Fulcrum’s commitment to the greater San Diego area, Fulcrum opened its Old Town office in 2021.

San Diego Civic and Industry Involvement
Civic and industry group involvement and participation is important in San Diego, and Fulcrum is proud to note that Fulcrum and Fulcrum staff are active participants and members of the following civic and industry groups:

- NAIOP
- Urban Land Institute
- Point Loma Association

San Diego Jurisdictional Relationships
Fulcrum recognizes that relationships with jurisdictions having authority is important. Fulcrum is proud to note that Fulcrum staff has developed, and maintains, solid relationships with staff in planning, building safety, engineering and fire prevention in many San Diego jurisdictions and with many utility providers.

San Diego General and Subcontractor Knowledge and Experience
General contractor and subcontractor relationships are important to project success. As only a local presence can provide, Fulcrum staff has cultivated positive working relationships with many San Diego general contractors and subcontractors. Fulcrum is eager to leverage these relationships to position the project for positive outcomes during planning, pre-construction, and project execution.

North County Logistics
Fulcrum understands some of the logistical challenges of working in North County. As such, Fulcrum is prepared to utilize Fulcrum’s experience in delivering North County projects, to ensure the proper planning and attention are focused project delivery during both pre-construction and project execution.
SECTION 7: FEE SCHEDULE

Fulcrum is pleased to offer the following Fee Schedule for the project. Fulcrum notes that the listed fees are inclusive of all overhead and profit.

EXPERIENCE

- Owner’s Representation on a wide variety of development, logistical, and capital expenditure programs.
  - Managed 5-year real estate capital expansion program for retail banking center client.
    - Over 20 banking centers in California and Arizona with aggregate expenditure in excess of $40 Million.
    - Responsible for total project implementation including site selection, due diligence efforts, budgeting, design guidance and A/E service procurement, GC bid and selection, construction oversight, and commissioning.
  - Successfully managed and delivered 90,000 SF multi-specialty health clinic within established $20 Million budget.
  - Successfully managed variety of logistical site closures and operational moves, often while maintaining operational status of end-users.
- Provides due diligence, preconstruction, construction monitoring, and construction project management consulting services.
  - Consulting services include Due Diligence Reviews, Plan and Cost Reviews, Impact and Permit Fee Studies, Property Condition Assessments, and Construction Draw Review Services for a wide variety of project types including multi-family, industrial, grocery, restaurant, sport facility, retail, medical and commercial uses.
  - Provides consulting services for over 50 projects to a client base that includes developers, debt and equity partners, and prospective purchasers.
- Development and construction experience includes multi-family, industrial, grocery, restaurant, sport facility, retail, medical, educational, office, ground-up, and tenant improvement projects.
  - Prepares, monitors, and manages both program and project CPM schedules for projects.
  - Develops, secures requisite approvals, monitors, and manages hard and soft cots budgets for all projects.
  - Manages the development and execution of procurement bid packages as projects requires.
    - Inclusive of architect, engineer, prime contractor, and miscellaneous vendor scopes of work.
  - Extensive experience in analyzing vendor bids/proposals for overall scope compliance and vendor comparison.
  - Adept at managing governmental approval processes and entitlement issues including advocating client’s interests in review boards and staff level negotiations.
  - Directed LEED certification efforts on four projects, including three as primary LEED AP.
WILL ELLIS | PROJECT MANAGER

ABOUT

Mr. Ellis holds a Bachelor of Social and Behavioral Sciences degree in Resource Economics with a concentration in Managerial Economics from University of Massachusetts Amherst.

As a Project Manager at Fulcrum, Mr. Ellis contributes to critical risk management and quality control practices through on-site observations and review of project documentation during all stages of the construction life cycle including Fulcrum’s Plan and Cost Reviews, Construction Draw Review Services, and Construction Project Management Services.

Fulcrum is able to provide various services within the Real Estate & Construction Lifecycle.
