Status Report Based on Phase 2: Organize for Impact Month 2

Collective Impact

In the process of developing a collective impact model to support Fallbrook Regional Health District (FRHD) goals, the Community Health Contracts (CHC) along with the collaborative efforts of **CentraForce, NCCCHI and Galvanized Strategies will implement the following concepts for 2019.**

- Funders and implementers collectively understand that social problems, and their solutions, arise from the interaction of many organizations within a larger system.
- Progress depends on working together toward the same goal and measuring the same thing.
- Large-scale impact depends on increasing cross-sector alignment and learning among many organizations.
- Business sectors are an essential partner for collective impact.
- Organizations share best practices and lessons learned.
